Sample requests ›
Contact details and what to send

Silicone labels

Compare a molded profile with a raised droplet finish. Use the sample number to identify the finish when contacting us.

SAMPLE 2540

Multicolor 3D molded silicone

Contrasting molded colors, a raised circular rim and a stepped profile.

View silicone labels ›

SAMPLE 2501

Droplet silicone transfer

Rounded silicone droplets form a pattern on the transfer.

SAMPLING

Send the intended fabric and finished label size so we can review the transfer on your material.

HF TPU & reflective labels

Vũ Thừa uses thermoplastic polyurethane (TPU) for its high-frequency (HF) labels. Reflective transfers offer a different set of surface finishes.

SAMPLE 2662

Textured silver HF TPU

Close-up views show the raised, ridged metallic surface and the edge of the relief.

View HF TPU labels ›

SAMPLE 2521

Color + silver reflective transfer

Printed details sit alongside silver reflective sections within the same design.

View reflective labels ›

SAMPLING

Share the target finish, fabric and any test requirements with your request.

Laser-cut films & patches

Compare a layered reflective film with a compact patch. Each reference below points to the sample shown.

SAMPLE 2659

Layered laser-cut film

A silver reflective base paired with a contrasting top layer. Detail shows how the cut layers meet.

SAMPLE 2535

Bordered patch

A compact woven patch with contrasting lettering and a colored border.
